AVID ADDS ALTIUM TO ITS DESIGN SERVICE BUREAU OFFERINGS

Twinsburg, Ohio (March 2010) – AVID Technologies Inc., a full service provider of advanced electronic product design services, has added Altium’s Designer Suite to its service offerings. Altium’s software provides a single unified electronic design solution for the entire design process with easy plug-in capabilities and a single GUI interface.

For 25 years, AVID has provided its customers with innovative engineering and product design services primarily utilizing tools from Mentor Graphics including PADS Layout, DXDesigner, and Expedition software, as well as the Cadence tools of OrCAD Capture and Layout. “Adding Altium to our capabilities is a very exciting move for us. Broadening our offerings increases new customer relationships, and allows us to continue to deliver high-quality design work to those customers who prefer Altium to be compatible with their own in-house tools”, comments AVID’s PCB Layout Department Manager.

About Altium – Altium provides software for electronic design processes including schematic capture, PCB Layout, FPGA design, simulation, and others. Altium’s unified electronics design environment links all aspects of electronics’ product design into one process, in a single application.

About AVID - AVID Technologies Inc., celebrating 25 years of advanced, innovative electronic product design excellence, employs 50 engineers, designers, technicians, and project managers. AVID assists a wide variety of customers in the creation of advanced electronic products, serving a variety of markets including Aerospace/Defense, Medical, Industrial/Process Controls, Consumer, and Automotive.
